

## **INFORMATIONAL WEBINAR**

### **What's Normal & When Should I Be Worried?**

Memory loss that disrupts daily life may be a symptom of Alzheimer's or other dementia. Alzheimer's is a brain disease that causes a slow decline in memory thinking and reasoning skills. Sometimes, when we forget things - like where we parked our car, we worry we might have dementia. This session will address typical age-related changes vs. signs of something more serious.

**When:**  
**April 21, 2022**  
**2:30pm**

**Where:**  
**Zoom Viewing**

#### **To Register:**

Click Here:

<https://www.agingtogether.org/upcoming-programs.html>

Or go to [www.agingtogether.org](http://www.agingtogether.org) and continue to the "Upcoming Programs" section under the Programs tab. Click on the "Register" button under the event listing.

A quarterly program of:

**The Piedmont Dementia Education Committee**

**Watch out for another PDEC program July 21,  
& the Dementia Education Conference on October 20!**

## **Our Presenters:**

**Jennifer A. Romano Morris, PsyD.**

Dr. Romano Morris is presently a senior neuropsychology fellow in the department of neurology at University of Virginia Health. She completed her graduate school training in clinical psychology at both Loyola University Maryland and Widener University's Institute for Graduate Clinical Psychology, earning both a certificate in neuropsychology and board certification in biofeedback therapy. Dr. Romano Morris's clinical interests are in providing neuropsychological assessments and psychological treatment for those with neurological conditions, including dementia, brain injury, stroke, and multiple sclerosis.

**Shannon E. Reilly, PhD,**

Dr. Reilly earned her doctorate degree in clinical psychology from the University of Virginia after completing her clinical internship at West Virginia University in the Department of Behavioral Medicine and Psychiatry. She is currently a second-year postdoctoral fellow in Clinical Neuropsychology at UVA Health in the Department of Neurology, as well as a Virginia Alzheimer's Disease Center (VADC) postdoctoral scholar. Clinically, she works at UVA Health's Memory and Aging Care Clinic (MACC), primarily conducting neuropsychological evaluations and clinical interventions with individuals with mild cognitive impairment (MCI) and dementia of various etiologies. Dr. Reilly's research focuses on dementia caregiver science and risk and protective factors for neurodegenerative conditions.
