Why is a Conversation on Aging Important to the Community?

- **Within ten years 1 in 4 citizens will be over 60**
- **Older citizens will need support from the community to remain here (your parents, your grandparents)**
- **Rising Seniors (Boomers) will have different ideas about how to grow older**
- **Parents with children wonder what the world will be like when they grow up**
- **Local government will need to plan for the community needs of older citizens**
- **Businesses will have to adapt to the changing market**
- **More of us will be caregivers for parents/family**

Attend a Conversation on Aging and share your thoughts about creating a community that will value and support all of us as we grow older.
